

Elementary Activity **Career Alphabet Book**

This activity will help your children increase their career awareness and learn a vocabulary of occupations and work activities.

1. Create an alphabet book with two to three pages for each letter.
2. As you are doing activities with the child, such as watching television, reading, shopping, or driving down the street, identify different workers and their occupations and talk about the letter of the alphabet with which the occupation starts.
3. In the alphabet book, add the name of the occupation to the appropriate letter's page.
4. Have the child draw a picture of the worker, his or her tools, work activities, or products.
5. To work on vocabulary development, talk with the child about what the worker was doing and add those words to the occupation and picture.
